PROJECTS

- **Live In The Best Place** (<https://liveinthebestplace.netlify.com/>)

- Worked on a 12 person team, split into front-end, back-end & Data Science. Responsible for working on the front-end team and collaborated with the back-end and Data Science teams to complete a fully functioning application within 7 weeks. This application helps the user find the best possible place to relocate, based on their preferences and factors chosen. Solely responsible for working with React, Redux and Axios to build out the city scroll bar and individual city pages.

- **TECH STACK:** React, Redux, Axios, MongoDB, Express, NodeJS, REST API

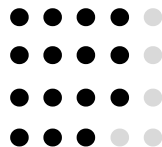

- **Foodie-Fun** (<https://github.com/Build-Week-Oct-2019-FoodieFun/Backend/tree/master/StartHere>)

- Worked in a 6 person team, and was in charge of creating a Java back-end that allowed users to store and save all of their favorite restaurant locations and also allowed them to leave a detailed review on their experiences (Yelp clone). Primarily responsible for utilizing the Java Spring framework to create all of the endpoints as well as the data handling on the back-end. This back-end was accessed by our mobile team in the creation of a Swift based iOS application.

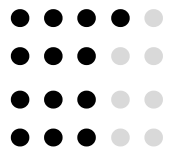

- **TECH STACK:** Java Spring, Swift
